What this standard covers

This standard specifies the use of code spreading orthogonal frequency division multiple access (CS-OFDMA) ways of working SCDMA broadband wireless access system technical requirements, including: System Reference Model, operating band, interfaces, functions, business and other technical requirements, base, service aggregation gateway device or module function, performance, power, environmental compatibility and electromagnetic compatibility and other requirements, well as operation and maintenance requirements. This standard applies to using code spreading orthogonal frequency division multiple access work, working band in line with national radio regulatory authority under SCDMA broadband wireless access system network equipment.

Document data

International classification (ICS): 33.070.99.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 43,455 words.
