What this standard covers

This standard specifies the use of code spreading orthogonal frequency division multiple access (CS-OFDMA) ways of working SCDMA broadband wireless access system user terminal device capabilities, performance, power, environmental compatibility and electromagnetic compatibility requirements. This standard applies to using code spreading orthogonal frequency division multiple access work, working band in line with national radio regulatory authority under SCDMA broadband wireless access system terminal equipment.

Document data

International classification (ICS): 33.070.99.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 20,297 words.
