What this standard covers

This standard specifies a wireless LAN (WLAN) and cdma2000 digital cellular mobile communication network interoperability architecture, services, network login and selection, authentication, billing, and technical requirements of RADIUS attributes. This standard applies to support cdma2000 digital cellular mobile communication network and wireless LAN (WLAN) interworking cdma2000 loosely coupled systems and WLAN systems and equipment.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 29,295 words.

Adopted international standard: 3GPP 2X.S0028-100-0, MOD.
