What this standard covers

This standard specifies the optical transport network (OTN) test method. Including: system reference point definition, overhead and maintenance signal testing, optical interface testing, jitter testing, network performance testing, OTN equipment functional testing, protection switching test, validation and control plane management function testing. This standard applies to terminal multiplexers and OTN OTN cross-connect equipment, including equipment including OTN OTN cross electrical cross-connect equipment, OTN OTN optical devices and optical cross hybrid cross device.

Document data

International classification (ICS): 33.040.20.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 92,944 words.

Adopted international standard: ITU-T G.783, NEQ; ITU-T G.825, NEQ; ITU-T G.8251, NEQ.
