What this standard covers

This standard specifies the IMS-based mobile communications in packet networks to carry PoC service (Phase II) of the PoC server PoC terminal and business functions, network interfaces, system configuration, business processes and the underlying protocol and other technical requirements, including control dry surface and the user plane business processes, the media stream control and media control technology requirements. This standard applies to the IMS-based push to talk (PoC) services (Phase II) of the PoC server and PoC Client.

Document data

International classification (ICS): 33.060.01.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 127,180 words.
