What this standard covers

This standard is mainly for electromagnetic safety, such as HEMP, HPEM and other electromagnetic threats, and puts forward the corresponding electromagnetic safety requirements application guidelines and mitigation measures. This standard specifies the general introduction of HEMP and HPEM, provides a detailed description of various safety issues and corresponding management application guidelines, classifies the physical electromagnetic environment of protected devices and equipment, and anticipates the expected threat level and immunity. Levels provide corresponding protection and mitigation measures.

Document data

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 17,116 words.
