What this standard covers

This standard provides strong electromagnetic interference in the case of HEMP telecommunications equipment to protect against the basic guidelines, and lists the existing protection measures, analysis of the existing lightning protection measures and the relationship between measures. This standard applies to telecommunications equipment for HEMP protection design and assessment of existing protective equipment against HEMP applicability.

Document data

International classification (ICS): 33.100.

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 31,363 words.

Adopted international standard: IEC 61000-5-3, MOD.
