What this standard covers

This standard specifies the wireless LAN equipment space RF radiated power and receiver performance measurement methods, including frequency range and limits. This standard applies to support GB 15629. 1101, GB15629. 1102, GB15629. 1104 and integration of cellular communications module of the device.

Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 28,210 words.
