What this standard covers

This standard specifies the power level, frequency band, function, performance index, reliability and so on requirements of 800MHz/2GHz cdma2000 digital cellular mobile communication network high speed packet data (HRPD) (third stage) access terminal. This standard applies to 800MHz/2GHz cdma2000 HRPD (third stage) access terminal that supports UIM card (machine card separation) and does not support UIM card (machine card). For 800MHz/2GHz cdma2000 HRPD (third Phase) access terminal, all the standards of this project are applicable to the UIM card does not support the 800MHz/2GHz cdma2000 HRPD (third stage) access terminal,

Document data

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 20,211 words.

Adopted international standard: 3GPP2 C.S0033-B V1.0, NEQ.
