What this standard covers

This standard specifies the CDMA2000 HRPD air interface requirements of the third stage, including the default signaling applications, the default packet application, multi-stream packet application, CDMA2000 circuit services notification application, enhanced multi-stream packet application, streaming layer, session layer, connection layer, security layer, MAC layer, the physical layer, the default (sub-type 0) and a physical layer protocol subtype 1, subtype 2 and the sub-type physical layer protocol physical layer 3 protocol. This standard applies to the use of high-speed packet data 800MHz/2GHz (HRPD) (third stage) technology digital cellular mobile communication systems.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 996,957 words.

Adopted international standard: 3GPP2 C.S0024-B V2.0, MOD.
