What this standard covers

This standard provides support for high-speed packet access (HSPA) of the fourth stage of WCDMA terminal equipment (UE) function, testing methods, such as batteries and chargers aspects, performance, business, environment, reliability. This section applies to support high-speed packet access (HSPA) single-mode WCDMA terminal fourth stage various types, this section also applies to dual-mode and multi-mode terminal end WCDMA module.

Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 217,285 words.
