What this standard covers

This standard specifies the 800MHz/2GHz CDMA2000 digital cellular mobile communication network simulation repeater and the repeater and repeater equipment covering communications South monitoring and management system to interface to the functional requirements, data requirements, technical requirements as well as specific functional analysis, interface design. This standard applies to the analog network management interface repeater equipment 800MHz/2GHz CDMA2000 digital cellular mobile communication network. Not included in the mobile communication network base station subsystem indoor distributed system management center, tower discharge, base station amplifiers can refer to the use of other similar products.

Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 171,126 words.
