What this standard covers

This standard specifies the CDMA2000 digital cellular mobile communication network user plane positioning system based on mobile positioning center (MPC) and the positioning entity (PDE) in the realization of the need to support positioning business operations, functions, operation and maintenance, interface signaling, software and hardware requirements and other technical requirements. This standard applies to CDMA2000 digital cellular mobile communication network user plane positioning system based on mobile positioning center (MPC) and positioning entity (PDE) devices.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 66,620 words.
