What this standard covers

This standard specifies the use of ultra-wideband (UWB) technology, transmitters, transceivers and receivers technical requirements and test methods, including the equivalent isotropic radiated power spectral density, bandwidth, spurious emissions, electromagnetic compatibility requirements, marking, labels, and instruction. This standard applies to ultra-wideband (UWB) devices.

Document data

International classification (ICS): 33.040.50.

Chinese classification (CCS): M19.

Estimated length of the Chinese original: 13,123 words.
