What this standard covers

This standard specifies the STM-256 of the main technical requirements, including STM-256 bit rate and frame structure, STM-256 multiplex mapping structure, STM-256 system configuration and application, STM-256 optical interfaces and application code, the light interface parameters, transmission performance requirements, technical requirements for dispersion compensation, FEC technical requirements, synchronization timing requirements and network management. This standard applies to public telecommunication network, dedicated telecommunications network can also refer to adopt.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 39,334 words.
