What this standard covers

This standard specifies the performance requirements, test configuration, environmental conditions and test methods for vehicle-mounted narrowband (300Hz-3.4kHz) hands-free voice communication (hereinafter referred to as vehicle-mounted hands-free) equipment, including the complete vehicle-mounted system and vehicle-mounted hands-free. The test of the microphone also includes the verification of the SRW (short-range wireless transmission) performance of the mobile terminal. This standard applies to the original vehicle-mounted hands-free system, the vehicle-mounted hands-free accessories installed later, the wired headset-microphone set and the wireless headset-microphone set.

Document data

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 78,766 words.

Supersedes the earlier edition YD/T 2308-2011.
