### What this standard covers

This standard specifies requirements for the packet-switched network (PSN) transmitted on the Ethernet frame encapsulation methods and the use of this method in the packet-switched network, point to point Ethernet business process simulation technology requirements. This standard applies to the MPLS network.

### Document data

International classification (ICS): 33.160.30.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 15,136 words.

Adopted international standard: IETF RFC4448-2006, NEQ.
