What this standard covers

This standard specifies the interface requirements for connection between multicast and MPLS VPN multicast service. Including interface requirements between the VPN multicast PE node information exchange. MPLS VPN Multicast module and inter- module interactive interface requirements. This section does not involve specific signaling information encoded implementation mechanism. This section applies to provide multicast services for virtual private network devices.

Document data

International classification (ICS): 33.040.

Chinese classification (CCS): M10.

Estimated length of the Chinese original: 11,175 words.
