What this standard covers

This standard specifies the structure, type, code, requirements, test methods, inspection rules, packaging, marking, transportation and storage of passive dispersion compensation modules based on dispersion compensation optical fibers. This standard applies to the design, development, manufacturing, use and acceptance of modules used in optical fiber communication transmission systems.

Document data

Chinese classification (CCS): M33.

Supersedes the earlier edition YD/T 2340-2011.
