What this standard covers

This standard specifies the definition, requirements, test methods, inspection rules and marking, packaging, transportation and storage of integrated lithium iron phosphate battery packs for communications. This standard applies to integrated lithium iron phosphate battery packs (composed of 16 3.2V batteries connected in series) used in -48V DC power supply systems. If the number of series connections is 15 or other situations, you can refer to it according to the actual situation.

Document data

International classification (ICS): 29.200.

Chinese classification (CCS): M41.
