### What this standard covers

This standard specifies the technical requirements and test methods for communication residual current protection with automatic reclosing. This standard applies to Communications Authority (station) with automatic reclosing residual current protection, current protection devices such as supplementary protection in direct contact, but not as the only direct contact protection. Installed in the device auto-reclose residual current protection can be implemented by reference.

### Document data

International classification (ICS): 31.220.20.

Chinese classification (CCS): M41.

Estimated length of the Chinese original: 26,233 words.
