What this standard covers

This standard specifies the network vulnerability index assessment method. This standard is suitable for computer network emergency response organizations to assess the vulnerability of network design, implementation, configuration, etc., and can also be used by other relevant departments for reference. This standard does not apply to assessing vulnerabilities in network management, such as personnel security, physical environment security, etc.

Document data

Chinese classification (CCS): L70.

Estimated length of the Chinese original: 16,110 words.

Supersedes the earlier edition YD/T 2388-2011.
