What this standard covers

This standard specifies the definition of fixed broadband access rate, test equipment requirements, benchmark test methods, alternative test methods and test data processing methods. This standard is applicable to test the access rate provided by broadband access service operators to household fixed broadband users, and also applies to the access rate when non-broadband access service operators provide users with fixed broadband access rate test services carry out testing. This standard does not apply to enterprise leased line access and cross-operator access.

Document data

Chinese classification (CCS): M30.

Estimated length of the Chinese original: 15,119 words.

Supersedes the earlier edition YD/T 2400-2018.
