What this standard covers

This standard specifies the technical requirements for three types of computing centers, including Internet data centers, intelligent computing centers and supercomputing centers, categorized in six aspects: green energy saving, availability, security, service capacity, computing power and efficiency, and low carbon emissions. This standard applies to the planning, design, construction, operation and maintenance and evaluation of computing centers.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M32.

Supersedes the earlier edition YD/T 2441-2013.
