What this standard covers

This standard specifies the product classification, requirements, test methods, inspection rules, packaging, marking, transportation and storage of solid polytetrafluoroethylene insulated braided tin-impregnated outer conductor type radio frequency coaxial cables. This standard applies to radio frequency coaxial cables used to transmit signals inside antennas of wireless communication equipment and various radio frequency modules.

Document data

International classification (ICS): 33.120.10.

Chinese classification (CCS): K13.

Estimated length of the Chinese original: 25,292 words.
