What this standard covers

This standard specifies the technical requirements, test methods, reliability tests, electromagnetic compatibility tests, inspection rules, marking, packaging, transportation and storage requirements for 50Gb/s single-fiber bidirectional optical transceiver modules. This standard applies to 50Gb/s four-level pulse amplitude modulation (PAM4) single-fiber bidirectional optical transceiver module.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 39,390 words.
