What this standard covers

This standard specifies the test methods for the optical transmitting/receiving section, high-speed/low-speed electrical signals, timing signals, and general parameters of single-wavelength optical transceiver modules used in optical communication. This standard is applicable to the testing of basic parameters of single-wavelength optical transceiver modules for optical communication.

Document data

International classification (ICS): 33.180.01.

Chinese classification (CCS): M33.

Supersedes the earlier edition YD/T 2798.1-2015.
