What this standard covers

This standard specifies the typical business model for users to access Internet services through cellular mobile communication networks, indicators of user experience related to network transmission quality, test methods, and information recording data processing methods. This standard is applicable to broadband speed testing in scenarios where users access the Internet through cellular mobile communication networks, and is not applicable to broadband speed testing in scenarios where mobile terminals ultimately access the Internet through fixed networks.

Document data

International classification (ICS): 33.060.80.

Chinese classification (CCS): M15.

Estimated length of the Chinese original: 17,177 words.

Supersedes the earlier edition YD/T 2892-2015.
