What this standard covers

This standard specifies the basic characteristics of the universal integrated circuit card (UICC)-terminal mass storage interface, mainly including: system architecture, physical characteristics, electrical characteristics, establishment of initial communication protocol, functional requirements, performance requirements, etc. This standard applies to the development and production of UICC and terminal interfaces that support large-capacity storage interfaces.

Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M36.
