What this standard covers

This standard specifies the architecture, network elements, interfaces, and processes of the converged policy control system of the fixed network equipment and the non-seamless offload mobile terminal in the WLAN scenario; and the interoperable policy control system architecture in the H(e)NB access scenario. Network elements, interfaces, and processes. Access scenarios other than WLAN and H(e)NB, such as ADSL access, are outside the scope of this standard.

Document data

Chinese classification (CCS): M10.

Estimated length of the Chinese original: 36,321 words.
