What this standard covers

This standard specifies the definition, classification, configuration, installation requirements, safety protection requirements, test methods, inspection rules, marking, packaging, transportation, storage, etc. of the embedded solar photovoltaic power supply system for communication. This standard does not apply to grid-connected and independent off-grid solar photovoltaic power systems, not suitable for hybrid power systems such as wind/optical complementary.

Document data

Chinese classification (CCS): M41.

Estimated length of the Chinese original: 32,372 words.
