### What this standard covers

This standard specifies the test method for interoperability air interface signaling interoperability between cdma2000 circuit domain and E-UTRAN, including terminal cdma2000CS domain registration and SMS, cdma2000 and E-UTRAN idle state reselection through E-UTRAN, GCSNA version and The LTE network handles the ability to bind multiple PDU messages.

### Document data

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 19,115 words.
