What this standard covers

This standard specifies the technical requirements and test methods for radio frequency indicators of public wireless LAN equipment operating in the 2400MHz~2483.5MHz, 5150MHz~5350MHz and 5725MHz~5850MHz bands, including maximum equivalent isotropic radiated power, maximum equivalent omnidirectional power spectral density, Frequency tolerance, spurious emissions, and more.

Document data

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 43,434 words.
