What this standard covers

This standard specifies the service interfaces and primitives exchanged in the MAC sublayer for all component entities in the second phase air interface MAC sublayer of the 800MHz/2GHz cdma2000 digital cellular mobile communication, and between the MAC sublayer and other cdma2000 sublayers. Exchanged business interfaces and primitives. This standard also specifies the standard process behavior of MAC sublayer entities. This standard is applicable to the air interface of the 800MHz/2GHz cdma2000 digital cellular mobile communication system.

Document data

International classification (ICS): 33.050.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 173,124 words.

Adopted international standard: 3GPP2 C. S0003-E Version 3.0, NEQ.
