What this standard covers

This standard specifies the structure and primitive details of the high-level (layer 3) signaling of the 800 MHz/2 GHz cdma2000 digital cellular mobile communication network (Phase 2) air interface. It includes the layer 3 signaling structure, the requirements of the mobile station CDMA operation, and the requirements of the base station CDMA working mode.

Document data

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 1,505,197 words.
