What this standard covers

This standard specifies basic signalling conformance testing methods for mobile stations in the 800MHz/2GHz cdma2000 digital cellular mobile communications network, including the following: air interface testing, basic call flow testing, idle handoff testing, handover testing, registration testing, and authentication testing Service redirection testing, supplementary service testing, forward compatibility testing, and concurrent service testing. This standard applies to CSIM/RUIM cards (machine card separation) and does not support CSIM/RUIM cards (in-one card) 800MHz/2GHzcdma2000 mobile communication terminals (hereinafter referred to as mobile terminals), including CSIM/RUIM cards that support UIMID and EUIMID.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 190,143 words.
