What this standard covers

This standard specifies the basic air interface test, common call test, registration test, authentication and encryption test, handover test, supplementary service of the 800MHz/2GHz cdma2000 digital cellular mobile communication network (second stage) mobile station (including the machine card). Tests, short message service tests, cdma2000 high-speed data service (HSPD) tests, business application tests, and positioning tests for network compatibility test methods. This standard applies to 800MHz/2GHz cdma2000 (second stage) mobile communication terminals (hereinafter referred to as mobile terminals) that support CSIM/RUINI cards (machine card separation) and do not support CSIM/RUINI cards (one card). Includes CS that supports UINIID and EUIMID

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 69,666 words.
