What this standard covers

This standard specifies the evaluation requirements for flat-rate digital mobile communication terminal specific absorption rate (SAR), including SAR evaluation procedures, uncertainty assessment, and test report requirements. This standard is applicable to flat-type digital mobile communication terminals (referred to as flat-panel terminals) devices with WWAN function. Such devices may also have one or more functions such as WLAN and Bluetooth. This standard also applies to products that meet the tablet terminal application model.

Document data

International classification (ICS): 33.100.

Chinese classification (CCS): M04.

Estimated length of the Chinese original: 13,122 words.
