What this standard covers

This standard specifies the definition and calculation methods of spectrum utilization factors, spectrum utilization efficiency, and relative spectrum utilization efficiency of public mobile communication systems under different scenarios. This standard is applicable to the typical standard of existing public mobile communications, including GSM, TD-SCDMA, WCDMA, cdma2000, TD-LTE, and LTE FDD.

Document data

International classification (ICS): 33.060.01.

Chinese classification (CCS): M14.

Estimated length of the Chinese original: 13,165 words.
