What this standard covers

This standard specifies the testing methods for carrier-grade NAT (NAT44) equipment, including basic functional testing, traceability testing, redundant functional testing, performance testing, and application testing. It also includes NAT and NAT. Related test requirements. The indicators listed in this standard shall be tested according to the conditions described in the corresponding test specifications. This standard applies to both card-type and stand-alone products.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M32.

Estimated length of the Chinese original: 27,257 words.
