What this standard covers

This standard specifies the general technical requirements for digital mobile communication terminals accessing China's public information and communication networks in terms of basic services and functions, basic performance, communication security, interconnection, network protection, emergency communication guarantee, information security, and personal information protection. And test methods. This standard is applicable to all digital mobile communication terminals that access China's public information and communication networks. Digital mobile communication terminals of dedicated information and communication networks can also refer to this standard.

Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 91,963 words.
