What this standard covers

This standard stipulates the purpose of the internal pressure resistance test of the communication cable microtubes, the sample, the test device, the procedure, the requirements, the details to be specified, and the result report. This standard applies to the micro-tubes used in the air-fibre laying of communication cables, and other air-fed cable channels can also be used as reference.

Document data

International classification (ICS): 33.180.10.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 6,686 words.

Adopted international standard: IEC 60794-1-22-2012, MOD.
