What this standard covers

This standard specifies the purpose, sample, method, details to be specified and result report for the microtubes on the disk to pass the test. This standard is applicable to the verification of the air-blown installation efficiency of the optical fiber unit for communication and the air-blown micro-optical cable (hereinafter referred to as "micro-cable") through experiments with micro-tubes on the disk.

Document data

International classification (ICS): 33.180.10.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 10,123 words.
