What this standard covers

This standard specifies the sealing, electrical performance, environmental performance, environmental protection performance, labeling, and inspection requirements for passive components (power dividers, couplers, bridges, combiners, loads, attenuators, etc.) in mobile communication distribution systems, and describes the corresponding test methods. This standard applies to the testing of passive components in mobile communication distribution systems; passive components in other application scenarios should refer to this standard.

Document data

International classification (ICS): 33.060.

Chinese classification (CCS): M30.

Supersedes the earlier edition YD/T 3251.1-2017.
