What this standard covers

This standard specifies the definition, classification, models, requirements, test methods, inspection rules, marking, packaging, transportation, and storage of load products for mobile communication distribution systems. This standard applies to loads used in mobile communication distribution systems in the 400MHz to 3700MHz frequency band. Loads in other frequency bands should refer to this standard.

Document data

International classification (ICS): 33.060.

Chinese classification (CCS): M30.

Supersedes the earlier edition YD/T 3251.6-2017.
