What this standard covers

This standard specifies the methods for the opening test of the performance parameters of HF mobile and mobile radio monitoring and direction finding systems, including the opening test conditions, the performance parameters of the opening test system and various performance test methods. The performance parameters of the test include ground wave measurement. Accuracy, system monitoring sensitivity, system direction finding sensitivity, frequency accuracy, monitoring minimum signal duration, direction finding minimum signal duration, system intermodulation suppression, etc.

Document data

International classification (ICS): 33.060.

Chinese classification (CCS): M30.

Estimated length of the Chinese original: 17,184 words.
