### What this standard covers

This standard specifies the product classification and naming, requirements, test methods, inspection rules, packaging, storage and transportation of unfilled cables in polyolefin insulated outdoor twisted pair cables for digital communication. This standard applies to local area networks, integrated wiring, and polyolefin insulated outdoor twisted pair cables for digital communication for transmission of low voltage and low power Ethernet power supply systems.

### Document data

Chinese classification (CCS): M42.

Estimated length of the Chinese original: 47,486 words.
