What this standard covers

This standard specifies how to support the multicast ping protocol to check the reachability of multicast forwarding paths in an IP multicast network, and how to support the multicast route detection protocol to track the multicast forwarding path. The deployment of multicast ping and multicast path detection is beneficial to improve the operation and maintenance and management capabilities of the multicast network.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): L79.

Estimated length of the Chinese original: 27,217 words.
