### What this standard covers

This standard specifies the cellular narrowband access (NB-IoT) security technical requirements and test methods for the Internet of Things, including the NB-IoT security architecture, security algorithms, data transmission security, and device security testing methods. This standard applies to the wireless network, core network and terminal equipment of cellular narrowband access (NB-IoT) for the Internet of Things.

### Document data

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 14,116 words.
