### What this standard covers

This standard specifies the dimensional parameters, transmission characteristics, mechanical and environmental performance requirements of B1.2 class cut-off wavelength displacement single-mode fiber, and the test method of the corresponding fiber characteristics. This standard applies to B1.2 type single mode fiber used in submarine communication cable, terrestrial communication cable and other information transmission equipment.

### Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 12,110 words.
